It is understood this will meet the minimum requirements of the Illinois Manual on Uniform Traffic Control Devices for Streets and Highways. Additional provisions regarding maintenance may be incorporated in this document as agreed upon by both parties.
- D. **Interconnect & Timing.** "Railroad interconnect" shall mean an electrical connection between a traffic signal controller and a rai1side railroad control system. A "signal interconnect" shall mean an electrical connection between two on-street traffic signal controllers or between a master controller and a central signal system. If the GOVERNMENTAL BODY desires a communications link to its office for monitoring purposes, the GOVERNMENTAL BODY shall pay the entire cost of installing and maintaining such monitoring system.
- The DEPARTMENT shall reimburse the GOVERNMENTAL BODY for 100% of the cost for installing and monthly servicing of short, remote strategic, and independent communication links. A. **Cost Sharing.** As indicated in Exhibit A, the cost of energy and maintenance of traffic signals, and/or other traffic control devices generally are shared in proportion to the number of approaches maintained by each unit of government however, other DEPARTMENT policies and practices requires cost sharing of energy and maintenance to be based on other criteria besides the number of approaches maintained. The maintenance cost of the interconnect and interconnect related equipment, as listed in Exhibit A, as well as engineering costs for any approved coordination and timing studies, shall be shared in proportion to the approaches maintained by each unit of government at all intersections within the interconnected system, unless otherwise agreed to in a permit or by other agreement. The share of the signal maintenance cost at an intersection will be borne one hundred percent by the DEPARTMENT where the ADT for the route is more than or equal to 35,000. The one hundred percent share will not apply to signal modernization, energy charges, new signal, and signal timing.

i. The GOVERNMENTAL BODY will be responsible for the maintenance costs of all traffic signals and/or other traffic control devices related to a roadway or roadways that has or have been jurisdictionally transferred by the DEPARTMENT to the GOVERNMENTAL BODY in a prior agreement(s).

ii. Any proposed single expenditure in excess of \$10,000.00 for repair or damage to an installation must be approved by the DEPARTMENT before the expenditure is made.

iii. The hours, or parts thereof, billed for each maintenance item will be at the actual time directly related to the work task. The DEPARTMENT reserves the right to examine the records of the GOVERNMENTAL BODY to determine that costs billed are fully documented.

iv. The GOVERNMENTAL BODY costs are composed of labor, equipment, materials, and the quantity of each. The cost for labor will be determined by the actual hourly rate for the employee plus a multiplier calculated by the GOVERNMENTAL BODY to include direct and indirect labor related costs, retirement, Social Security, health, hospitalization and life insurance, holidays, vacation, sick leave and worker's compensation. Equipment costs will be as listed in the Schedule of Average Annual Equipment Ownership Expense. Materials will be at cost.

v. The cost for contracted work will be the actual cost for the contractor.

If, at any time, the contractor fails to perform any work deemed necessary by the DEPARTMENT's Regional Engineer to keep the traffic signals in proper operating condition, or if the Engineer finds it impossible to contact the designated persons to perform any work, the DEPARTMENT reserves the right to have other electrical contractors perform the needed work. The cost of such work will be invoiced to the GOVERNMENTAL BODY directly from the appointed contractor providing the service.

9. ACCIDENT DAMAGE

Be responsible to make recovery for damage to any part of the installation or system from the party causing the damage. Document damage to facilities and notify the Department of the

damage to determine the required repair or replacement.

Whenever third-party claims cannot be recovered, the GOVERNMENTAL BODY shall share in the loss in accordance with the percentages shown in Exhibit A.

10. TEMPORARY TRAFFIC CONTROL.

Provide temporary traffic control during a period of equipment failure or for when the controller must be disconnected. This may be accomplished through the installation of a spare controller, placing the intersection on flash, manually operating the controller, or manually directing traffic through the use of proper authorities.

When work is within the traveled way, provide protection for workers and for traveling public by providing adequate traffic control. The traffic control shall conform to the latest edition of Manual on Uniform Traffic Control Devices.

11. EMERGENCY PERSONNEL

Provide skilled maintenance personnel who will be available to respond within one (1) hour to emergency calls. This may be provided by agency forces, contract, or maintenance agreement. Controller failure, lights out, knockdowns, or two (2) red lights out at intersection are considered emergencies.

B. AS REPORTED OR OBSERVED

1. SIGNAL ALIGNMENT

Keep signal heads properly adjusted, including plumb, and tightly mounted. All controller cabinets, signal posts and controller pedestals should be tight on their foundations and in alignment.

2. CONTROLLER PROBLEMS

Check the controllers, relays, and detectors after receiving complaints or calls to ascertain that they are functioning properly and make all necessary repairs and replacement.

3. LED SIGNAL HEAD AND LED MODULE REPLACEMENT

An LED module shall be considered failed and shall be replaced if at least one-fourth of the signal indication is dark or if the module fails to meet ITE specification on minimum maintained luminous intensity.

Replace failed modules for all red signal indications within twenty-four (24) hours of notification of failure or on the next business day following the notification. However, if two or more red indications for an approach are failed, these modules must be replaced as soon as possible, and under no circumstances longer than twenty-four (24) hours after notification. Replace all other failed modules within forty-eight (48) hours or next business day of notification of failure.

Provide replacement LED modules and LED signal heads that fully comply to the latest applicable Institute of Transportation Engineers (I.T.E.) specifications.

4. PAINTING

Painted signal components shall be repainted as necessary per the paint system's manufacturer's requirements.

C. WEEKLY

1. MASTER CONTROLLER SYSTEMS

At locations that are a part of a closed loop signal system maintained by the GOVERNMENTAL BODY, repair any and all malfunctions in a timely manner so that the signals remain under the

control of the master at all times.

As needed assist in the implementation of the signal system timing plans.

Maintain the central and closed loop signal system management software (Aries, Tactics, Centracs, etc.) on a PC or a server so that the signal system is monitored weekly. Check weekly by phone or location visit for any malfunction. Verify software accuracy to central office software.

Ensure that communications to master controllers and central signal systems (telephone lines, radio broadband connections, etc.) are functioning and report issues to service providers for repair. Where applicable the GOVERNMENTAL BODY shall utilize JULIE for locate services.

D. BI-MONTHLY (Every 2 months)

1. CABINET INSPECTION

Check the controllers, relays, and detectors to ascertain that they are functioning properly and make all necessary repairs and replacement.

Keep interior of controller cabinet in a clean and neat condition at all times. Replace filters per manufacturer's recommendations.

2. OBSERVE SIGNALS

Observe the signals at the time of the bi-monthly cabinet inspection. This involves stopping and watching for correct detection and timing operation.

3. DETECTION TESTING

Test and inspect vehicle detection inductance loops, loop detectors, and pedestrian detection during cabinet visit bi-monthly.

4. VIDEO DETECTION TESTING

Inspect, maintain, and clean all video detection and surveillance systems bi-monthly or as needed, to achieve clean lenses, and adjust for proper alignment and proper focus. This shall include system camera, lenses, camera housings and hood/shield, pan tilt, and zoom mechanisms and motors, mounting brackets and hardware, poles, microprocessors, controller, cables and communication equipment, and other related components. Maintenance shall include modifications to programmable detection zones.

5. CONTROLLER CHECK

When controllers malfunction, they shall be removed, repaired, and bench checked. The controllers shall not be removed for annual maintenance inspections.

This bi-monthly check should verify software with central office software and reprint cabinet pack timings sheet. Controller check shall occur during the bi-monthly cabinet inspection.

6. FUSE AND BREAKER CHECKS

Fuse and breaker checks should occur during the bi-monthly cabinet inspection. Replace burned out fuses or deteriorated breakers as needed.

E. ANNUALLY

1. SIGNAL HEADS VISIBILITY

Remove any obstruction blocking the line of sight of the traffic signal face to the motorist, including snow and ice. The maintaining agency shall trim trees, bushes or any other form of vegetation blocking said lines of sight. The maintaining agency shall remove, or order the

removal of, any man-made obstructions such as signs or banner blocking said line of sight. Visibility for line of sight shall meet the standards established and contained in the Manual on Uniform Traffic Control Devices (MUTCD). All trimmed vegetation shall be legally disposed of by the maintaining agency off the right of way.

2. ANNUAL HARDWARE INSPECTION

Inspect all mast arm assemblies, mast arm poles, brackets (or other types of hardware) supporting traffic heads or pedestrian signal heads on an annual basis. The inspection shall focus on the structural elements of the mast arm assembly and must include a close-up arm's length investigation of the mast arm, pole, mast to pole connection, base plate, and anchor bolts.

The arm of the assembly shall be visually inspected at all signal head connections for any defects, such as cracks or buckles. Inspect the mast arm to pole connection for significant loss of section, cracks in welds or base metal, and deterioration of the connection plates. The bolts of the arm to pole connection shall be inspected for tightness and condition. Check the pole for external corrosion, impact damage, rust through perforation, deflection, distortion, or cracking. Closely inspect pole for corrosion near the base plate, especially if mounted on a grout bed. Check welds of the pole to base plate connection for cracks. Inspect base plate for section loss or deformation. Inspect mast arm anchor bolts for any corrosion or bending, and for loose or missing nuts.

Upon discover of any buckles or significant structural defects (loose or missing nuts, severe corrosion or dents, cracks in welds, plate or structure, etc.), take corrective action in a timely manner.

3. ANNUAL CONFLICT MONITOR AND MMU TEST

Test all conflict monitors and MMUs once every two years in accordance with manufacturer recommendations. Failed conflict monitors or MMUs shall be replaced with new units.

The GOVERNMENTAL BODY, upon request, shall submit copies of the CMU/MMU test reports to the DEPARTMENT. These reports shall be maintained pursuant to Part 2, Paragraph E., "Records Preservation" of the AGREEMENT.

4. PAVEMENT MARKINGS
