8.1.6 Parking Schedule

- A. All off-street parking spaces provided required by this development code, except those required for one- and two-family dwellings, shall be designed in accordance with one of the formulae set forth in the Off-Street Parking Schedule below. Off-street parking spaces shall be provided in accordance with the Off-Street Parking Schedule. In addition to the requirements of the Parking Schedule, a business must also provide one space for each business vehicle parked at the business. Parking spaces for accessory uses not specifically enumerated within a parking class shall be assumed to be included in the principal (permitted or special) use requirement. If, for any reason the classification of any use, for the purpose of determining the amount of off-street parking or the number of spaces to be provided by such use is not readily determinable, the parking class of such use shall be established by the Zoning Administrator.
- B. In computing required parking spaces, the total number of required spaces shall be based upon use(s) of the zoning lot or portion thereof. Therefore, one principal use may actually contain two or more parking class uses (e.g., retail sales and warehousing).
- C. In the event this ordinance does not specify the number of parking spaces for a specific use, the Zoning Administrator shall determine the number of spaces required. In making this determination of the number of spaces required for a proposed use, the Zoning Administrator shall consider the number of parking spaces required for the listed use most similar to the proposed use in terms of parked vehicles which are expected to be generated. In determining the number of parked vehicles likely to be generated by a use, the Administrator shall consider the square footage occupied by the use where appropriate. In the alternative, the Zoning Administrator may consider the number of employees and patrons which are anticipated for the proposed use.
- D. No required parking spaces are required in the B1 District. However, if parking is provided, other than the number of spaces, all other requirements as set forth in 8.1.5.H above apply as though the spaces were required, with the exception of landscaping requirements.
- E. When determination of the number of off-street parking spaces required below results in a requirement of a fractional space, any fraction of less than one-half may be disregarded, while a fraction of one-half or more, shall be counted as one parking space. Parking spaces required on an employee basis shall be based on the maximum number of employees on duty or residing or both, on the premises at any one time.
