

Fully operational CodeRED for IPAWS

The CodeRED for IPAWS service is designed specifically to enable local government officials to send secure, critical communications to their citizens, providing the ability to deliver Presidential Alerts, Imminent Threat Alerts and AMBER Alerts from a single portal to communication pathways that include Emergency Alert System, Wireless Emergency Alert and National Weather Service Dissemination Systems.

- ✓ Fully functional and operational tool
- ✓ Compliant and integrated with IPAWS Architecture & EAS
- ✓ Confirmation back once message is submitted
- ✓ Immediate availability for authorized use
- ✓ Statewide IPAWS licensing available (State license enables access to all authorized users)
