See below....she must have known you were asking.

The schematic view that she refers to is the same one that Sean sent to you yesterday.

Let me know if her response is sufficient.

Thank you Mike. I just want to make sure that the information we are agreeing to is completely accurate (just in case). Per the schematic view you just sent and the pictures/lines confirmed by the city we are definitely in agreement.

It never hurts to be super accurate though;)

Melissa, see attached. The blue line starts at the south end, and (combined with the green line) shows both cuts. The pictures may not have been too clear, as I was between the fences when I took them (I did not want to go into your mother's back yard without your ok) but that is our intent.

Let me know.

Hello Mike,

Yes we are in agreement with cutting down at the 5<sup>th</sup> capstone seam (the one directly above the orange fence post) to the blue/green line drawn by the city. However, this statement does not also discuss the rest of the line or the second cut towards the end of the wall. Can you or Sean please write something up that presents both cuts in more detail?

Thank you,  
Melissa

**Subject:** 1808 Moss

All—to confirm the discussion from last Friday—the Jumeres intend to cut the wall as shown by the blue and green lines marked by the city on the wall (see attached photos). The cut starts at the south end of the wall and runs to the 5<sup>th</sup> capstone seam from the house (approximately 30 feet from the house).

Ross, please amend our appeal to ask for approval of the wall as cut as described above.

Melissa, please confirm that this resolution of the wall issue is satisfactory to your mother.

Ross, if there is anything else we need to get this on the council agenda for July 24, please let us know.

Mike
